Deterministic Operations Research Models

Instructor: Laurent Poirrier

lpoirrier@uwaterloo.ca

◆□▶ ◆□▶ ◆臣▶ ◆臣▶ □臣 ○のへ⊙

What is this course about?

Theory and practice of Operations Research (OR),

▲□▶ ▲□▶ ▲ 臣▶ ▲ 臣▶ ― 臣 … のへぐ

application to real problems.

Operations Research:

 \rightarrow solve decision-making problems

using mathematical modeling and optimization.

Applications:

military (logistics, supply chain)

- manufacturing (scheduling, lot sizing)
- transportation (vehicle routing, shortest path)
- telecommunications (flow problems, network design)

▲□▶ ▲□▶ ▲□▶ ▲□▶ ▲□ ● ● ●

financial engineering (portfolio management)

What will we learn?

- Modeling: formulate problem mathematically,
- Solving: find solution algorithmically.

Objective of the course: solve practical problems on your own computer.

What will we learn?

- Modeling: formulate problem mathematically,
- Solving: find solution algorithmically.

Objective of the course: solve practical problems on your own computer.

Course organisation (see syllabus on learn)

▲□▶ ▲□▶ ▲ 三▶ ▲ 三▶ - 三 - のへぐ

Material covered:

- Linear optimization
- Integer optimization
- Decision-making under uncertainty
- Solving large-scale models.

Prerequisite: CO 250 or similar.

Grading

| 4 homework assignments | 20% |
|------------------------|-----|
| Midterm | 30% |
| Final | 50% |

Part I: Linear Optimization

Linear Programming (LP) is the problem of maximizing or minimizing a **linear function** subject to a finite number of **linear constraints**.

▲□▶ ▲□▶ ▲ 臣▶ ▲ 臣▶ ― 臣 … のへぐ

A Linear Programming (LP) is characterized by

▲□▶ ▲□▶ ▲ □▶ ▲ □▶ □ のへぐ

- decision variables,
- ► a linear objective function,
- ▶ a (finite) number of linear constraints.

A company produces NH_3 and NH_4Cl .

| component | stock | | | | | | |
|-----------|----------|--|--|--|--|--|--|
| N | 50 kmol | | | | | | |
| H | 180 kmol | | | | | | |
| Cl | 40 kmol | | | | | | |
| | | | | | | | |
| product | revenue | | | | | | |

| product | revenue | | | | | | | |
|----------|-------------|--|--|--|--|--|--|--|
| NH_3 | \$40 / kmol | | | | | | | |
| NH_4Cl | \$50 / kmol | | | | | | | |

▲□▶ ▲□▶ ▲ 臣▶ ▲ 臣▶ ― 臣 … のへぐ

Plan production to maximize profit.

| <pre>@variable(model, x1)</pre> | | | | | | | | | | |
|--------------------------------------|----|---|------------|---|----|---|----|-----|-----|---|
| <pre>@variable(model, x2)</pre> | | | | | | | | | | |
| | | | | | | | | | | |
| Cobjective(model, Max, | 40 | * | x1 | + | 50 | * | x2 | | |) |
